CONTENTS OF VOLUME 52

NUMBER 1—JULY

PAGE

Infinite frequency structure-preserving transformations for general polynomial system matrices. G. E. HAYTON, A. B. WALKER and A. C. PUGH 1

H_∞ robust controller for self-tuning applications. Part 3: Self-tuning controller implementation. N. A. FAIRBAIRN and M. J. GRIMBLE 15

Adaptive force control of robot manipulators. R. CARELLI, R. KELLY and R. ORTEGA 37

Spectral factorization and LQ-optimal regulation for multivariable distributed systems. F. M. CALLIER and J. WINKIN 55

Simple adaptive control for a class of non-linear systems with application to robotics. I. BAR-KANA and A. GUEZ 77

Sliding-mode controller design of a single-link flexible manipulator under gravity. K. S. YEUNG and Y. P. CHEN 101

New algorithm for non-square internal model control systems. FENG-SHENG WANG and CHEN-PING HO 119

Adaptive suboptimal filtering of bilinear systems. XUESHAN YANG, R. R. MOHLER and R. M. BURTON 135

Feedback logic for discrete event systems with arbitrary control patterns. TOSHIMITSU USHIO 159

Dynamical order assignment for linear descriptor systems. M. M. FAHMY and H. S. TANTAWY 175

Special coordinate basis for order reduction of linear multivariable systems. H. K. OZCETIN, A. SABERI and P. SANNUTI 191

PLL-based digital control with Åström–Hägglund tuning. J. GLARÍA and R. ROJAS 227

Application of dynamic programming to high-dimensional non-linear optimal control problems. R. LUUS 239

Causality in the frequency domain. S. Q. ZHU 251

Correspondence

Control of reverse-reaction processes via a pseudo-predictor. C. YOUNG, M. O'MALLEY and A. M. DE PAOR 261

NUMBER 2—AUGUST

Modelling and stability analysis for a class of industrial repetitive processes. E. ROGERS and D. H. OWENS 265

PAGE

Gain transfer: an algorithm for decentralized hierarchical estimation. W. T. GARDNER and C. T. LEONDES 279

Parametric interpolation, H^∞-control and model reduction. D. J. N. LIMEBEER and M. GREEN 293

Interpretation of non-linear frequency response functions. J. C. PEYTON JONES and S. A. BILLINGS 319

Feedback canonical form for singular systems. H. GLÜSING-LÜERßEN 347

Feedforward control of disturbances in multivariable feedback control systems. J. VAN DE VEGTE 377

Relations between information criteria for model-structure selection. Part 1: The role of bayesian model order estimation. S. M. VERES 389

Relations between information criteria for model-structure selection. Part 2: Modelling by shortest data description. S. M. VERES 409

Unified adaptive control of non-minimum-phase systems. Part 2: Target tracking and dynamic compensation. WEI LIN, YINPING WANG and JIONGMIN YONG 423

Robust stabilizability of discrete-time systems with normalized stable factor perturbation. D. J. WALKER 441

MIMO servo design by the split control method. J. A. CRO GRANITO and J. K. HEDRICK 457

Adaptive control in the presence of markovian parameter jumps. CHUN YANG, P. BERTRAND and M. MARITON 473

Phase margins for multivariable control systems. J. R. BAR-ON and E. A. JONCKHEERE 485

Fast adaptive stabilization of first order plants with unknown sign of the high frequency gain. R. ORTEGA, YU TANG and G. ESPINOSA 499

Partial integrity. P. M. G. FERREIRA 509

NUMBER 3—SEPTEMBER

Improvements in the formulation and solution approach for stochastic optimizing control of steady state industrial processes. J. LIN, M. WANG and P. D. ROBERTS 517

Augmented model-based double iterative loop techniques for hierarchical control of complex industrial processes. M. BRDYŚ, N. ABDULLAH and P. D. ROBERTS 549

Composite feedback control for a class of non-linear singularly perturbed systems with fast actuators. JUHNG-PERNG SU and JER-GUANG HSIEH 571

Robust control for the tracking of robot motion. D. M. DAWSON, Z. QU, F. L. LEWIS and J. F. DORSEY 581

Generalized multirate-output controllers. TOMOMICHI HAGIWARA, TOSHIFUMI FUJIMURA and MITUHIKO ARAKI 597

PAGE

Design of a PI-type state feedback optimal servo system. KAZUO AIDA and TOSHIYUKI KITAMORI 613

Robust stability and performance of systems with structured and bounded uncertainties: an extension of the guaranteed cost control approach. O. I. KOSMIDOU 627

Parametrization of minimum-time output deadbeat controllers for all classes of invertible systems. M. H. AMIN 641

RELION—time-sub-optimal variable structure control law. A. I. MOROZ 655

Approximation and identification of continuous-time systems. P. M. MÄKILÄ 669

Minimal realizations interpolating first- and second-order information. KAZUMI HORIGUCHI, TAKUYA NISHIMURA and AKIRA NAGATA 689

Inherent observer property in a class of anti-windup compensators. K. S. WALGAMA and J. STERNBY 705

Adaptive stabilization and resonance suppression. A. J. TELFORD and J. B. MOORE 725

Relations between information criteria for model-structure selection. Part 3: Strong consistency of the predictive least squares criterion. S. M. VERES 737

Robustness with real parametric and structured complex uncertainty. R. S. SÁNCHEZ PEÑA and A. SIDERIS 753

Erratum 767

NUMBER 4—OCTOBER

Riccati equation approach to maximizing the complex stability radius by state feedback. D. HINRICHSEN, A. J. PRITCHARD and S. B. TOWNLEY 769

Identification of non-linear distributed parameter systems via orthogonal functions. B. M. MOHAN and K. B. DATTA 795

Relationship between three discrete-time H^∞ algebraic Riccati equation solutions. D. J. WALKER 801

Decentralized variable structure control for tracking in non-linear systems. S. K. SINGH 811

Two-dimensional model and algorithm analysis for a class of iterative learning control systems. ZHENG GENG, R. CARROLL and JAHONG XIE 833

Mapping non-linear integro-differential equations into the frequency domain. S. A. BILLINGS and J. C. PEYTON JONES 863

Bounding the states of systems with unknown-but-bounded disturbances. WEI K. TSAI, A. G. PARLOS and G. C. VERGHESE 881

Continuous-time weighted least-squares algorithm and its application to adaptive feedback control. Z. IWAI and M. ISHITOBI 917

Robust trajectory following of robots using computed torque structure with VSS. S. W. WIJESOMA and R. J. RICHARDS 935

Strictly proper projective controllers for disturbance attenuation. R. A. RAMAKER, J. MEDANIĆ and W. R. PERKINS 963

PAGE

Invertibility and decoupling of linear time-varying systems. D. J. BELL and W. TSANG 983

Convergence of a class of Padé approximations for delay systems. J. LAM 989

Correspondence

Comments on 'A Lur'e-type Lyapunov function for multimachine power systems with transfer conductances'. R. X. QIAN and C. L. DEMARCO 1009

Comments on 'Design of reduced-order optimal estimators directly in the frequency domain'. CH. WURMTHALER and P. HIPPE 1017

NUMBER 5—NOVEMBER

Observations-weighted controllers for single-input single-output stochastic systems using a perturbed-type dual criterion. KEIGO WATANABE and S. G. TZAFESTAS 1019

Polynomial optimization of stochastic continuous-time control for unstable plants. A. P. ROBERTS and M. M. NEWMANN 1035

Optimal reduced-order estimators in the frequency domain: the discrete-time case. P. HIPPE and CH. WURMTHALER 1051

New method for the design of a reduced-order controller. U. A. BRUNNER 1065

Statistical linearization: a comparative study. D. REARDON and W. E. LEITHEAD 1083

Observer-based control of uncertain systems with non-linear uncertainties. A. SABERI and P. SANNUTI 1107

State estimation for non-linear uncertain systems: a design based on properties related to the uncertainty bound. Y. H. CHEN 1131

Convergence analysis of linear dynamical systems by high gain and high dynamic compensation. P. MENSAH and B. K. GHOSH 1147

Non-linear functions and stability of motions of implicit differential systems. V. B. BAJIČ 1167

Wiener–Hopf design of servo-regulator-type multivariable control systems including feedback compensation. KIHEON PARK and J. J. BONGIORNO JR 1189

ρ-Stability and robustness: discrete-time case. H. BOURLÈS, Y. JOANNIC and O. MERCIER 1217

H^∞-optimal solutions of robust regulator problem for linear MIMO systems. Q.-H. WU and M. MANSOUR 1241

Kalman-type decomposition for implicit linear discrete-time systems, and its applications. A. BANASZUK, M. KOCIĘCKI and K. M. PRZYŁUSKI 1263

Boundedness of oscillations in relay feedback systems. LIU HSU 1273

Correspondence

Correction to 'Generalized robustness of optimality of linear quadratic regulators'. KENJI SUGIMOTO and YUTAKA YAMAMOTO 1277

NUMBER 6—DECEMBER

PAGE

Moment matching model reduction for multirate linear systems. D. WILLIAMSON, R. E. SKELTON and G. ZHU 1279

Review of wind turbine control. S. A. DE LA SALLE, D. REARDON, W. E. LEITHEAD and M. J. GRIMBLE 1295

Bezout identities and common minor zeros of 2-D polynomial matrices, and applications to time-delay systems. EITAKU NOBUYAMA, SEIICHI SHIN, SHIGENORI OKUBO and TOSHIYUKI KITAMORI 1311

Practical identification of NARMAX models using radial basis functions. S. CHEN, S. A. BILLINGS, C. F. N. COWAN and P. M. GRANT 1327

Steady-state closed-loop structural interaction analysis. R. D. JOHNSTON 1351

Feedback control of linear decentralized control systems: an algebraic approach. J. S. LEE and P. K. C. WANG 1371

Towards a link between the factorization approach and MIMO robust adaptive control. GWO-WEN UENG, BOR-SEN CHEN and WEN-LIANG CHEN 1391

Robust finite time settling control of distributed parameter systems. S. CHOURA and S. JAYASURIYA 1425

Performance improvement using time delays in multivariable controller design. WOOK HYUN KWON, GI WON LEE and SANG WOO KIM 1455

Method of support problems for solving a linear-quadratic problem of terminal control. A. S. CHERNUSHEVICH 1475

Decidability for a temporal logic used in discrete-event system analysis. J. F. KNIGHT and K. M. PASSINO 1489

Frequency-domain approach for critical systems. G. P. LIU 1507
